SUMMARY

Motivated full-stack developer with strong communication skills and a dedication to teamwork. Quick learner with a passion for continuous improvement, exploring new concepts such as design patterns and problem- solving algorithms in my free time. Eager to contribute to innovative projects and grow within a dynamic tech environment.

PROJECT

Monday Clone Project
· Designed and implemented a project management application clone using React and Node.js, focusing on task management and team collaboration features.
· Integrated modern JavaScript frameworks and optimized for performance and user experience.

Gmail and Google Keep Combined
· Developed a unified productivity application combining email management and note-taking functionality.
· Utilized modern web technologies for seamless integration and responsive design across devices.

Toy Store Project
· Built a full-stack e-commerce application for a toy store using React frontend and Node.js backend.
· Implemented shopping cart functionality, product catalog, and database management with MongoDB for inventory and order processing.

EDUCATION

Full-Stack Development Course
Coding Academy · 2024-2025
· One-year intensive program.

Full-Stack Web Development Course
Udemy · 2024

CERTIFICATIONS

Full-Stack Development Certification
2024
